

Biography

My name is Robert Ireland. I am a male. I am currently the only member. I am currently working on all aspects of the business. I have nine associates degrees. I completed my last associates degree in 2018 at Solano Community College in Fairfield California. I should have a Bachelor's degree in Computer Engineering from UC Davis by the fall of 2020. I have worked with a total of two startups before this project. I worked with my grandpa on his bug framing startup for a few months. That experience inspired me to begin my own startup where I was doing similar projects. However, after I got accepted to UC Davis to major in computer engineering, I knew I needed to try to tackle a significant, relevant, and meaningful challenge.
